Portfolio: rk7326181-lab.github.io · github.com/rk7326181-lab

SUMMARY

MIS Analyst at Shadowfax Technologies with hands-on experience building BigQuery pipelines, geospatial payout analytics and automated operations dashboards for last-mile logistics. Delivered **₹16–17 lakh a month in payout savings** against a ₹20 lakh/month target and cut a clustering run from **4–5 hours to under 1 hour**. MBA in Banking Technology; HackerRank-certified in SQL (Basic & Intermediate).

EXPERIENCE

Shadowfax Technologies, Bengaluru

Jul 2025 – Present

MIS Analyst, Strategy, Planning & Analytics (Jan 2026 – Present) · converted to permanent from MIS Executive, contract (Jul 2025 – Jan 2026)

- Delivered **₹16–17 lakh/month in payout savings** (target ₹20 lakh/month) with a geospatial cluster-payout model covering **1,400+ hubs and 13,000+ payout polygons**, flagging mispriced polygons and recommending rate or radius fixes.
- Built **DE Rider MIS** (live): Slack → Apps Script pipeline that filters a ~950K-row daily export (492 MB → 3 MB), applies approved payout rules (CPO, minimum guarantee, prorated salary, incremental burn) and serves a role-based dashboard for **780+ riders and ~5 lakh orders a week**; 100+ automated tests.
- Built the **DA Rider Portal**: Gmail → Sheets → web dashboard tracking attendance, productivity and cost per order for 250+ riders (1.3 lakh+ orders/month); automated HR's monthly payroll attendance file and corrected a cost sheet that understated real cost by ~60%.
- Built a **Geo Intelligence Portal** (Streamlit) that generates payout polygons and per-shipment P&L from BigQuery, replacing a Jupyter + My Maps + Excel workflow and cutting each run from **4–5 hours to 30–60 minutes**.
- Maintain SQL / BigQuery reporting and KPI dashboards for operations, finance and HR; flagged and escalated misuse of delivery credentials for bonuses (fraud analytics).

Sabudh Foundation × STPI

Jul 2026 – Present

Data Analytics Intern (online, alongside full-time role)

- Structured programme: SQL, Python, Power BI, PySpark, Dataiku, machine learning & forecasting, NLP and applied LLMs, with a capstone project.

Indian Overseas Bank, Puducherry

Jun 2024 – Aug 2024

Banking Intern

- Processed KYC and account-opening data on Finacle for a bulk onboarding drive; corrected customer records.

SKILLS

Data & SQL	SQL, Google BigQuery, DuckDB, SQLite, ETL pipelines, data modelling
Python	pandas, NumPy, GeoPandas, Shapely, scikit-learn, Streamlit, Plotly / Dash, Folium
BI & reporting	Power BI, Looker Studio, Advanced Excel, Google Sheets, KPI and MIS reporting
Automation	Google Apps Script, Gmail / Slack APIs, GitHub Actions, Git, Docker
Analysis	Cost-benefit and root-cause analysis, anomaly detection, logistics and payout analytics
