Portfolio: rk7326181-lab.github.io | GitHub: github.com/rk7326181-lab

PROFESSIONAL SUMMARY

Data and MIS Analyst at Shadowfax Technologies, a last-mile logistics company, turning operational data into cost and productivity decisions using SQL (BigQuery), Python and automated reporting. Delivered **INR 1.6–1.7M per month** (**≈ US\$18–20K**) in **payout savings**, cut a core analysis cycle by **~85%**, and built four internal analytics tools now used by operations, finance and HR. MBA in Banking Technology.

EXPERIENCE

Shadowfax Technologies, Bengaluru, India

Jul 2025 – Present

MIS Analyst, Strategy, Planning & Analytics (Jan 2026 – Present); MIS Executive (Jul 2025 – Jan 2026), converted from contract to a permanent role

- Reduced rider payout cost by **INR 1.6–1.7M per month** (80–85% of a INR 2.0M monthly target) by building a geospatial cost model over **1,400+ hubs and 13,000+ payout zones** that flags mis-priced zones using distance analysis, point-in-polygon shipment matching and anomaly detection (Isolation Forest).
- Automated Delivery Executive cost and productivity reporting for **780+ riders and ~500K orders per week**: a Slack-triggered Apps Script pipeline filters a 950K-row daily export (492 MB → 3 MB), applies manager-approved payout formulas and feeds a role-based dashboard; replaced daily manual Excel work, backed by 100+ automated tests.
- Built an attendance, productivity and cost-per-order monitoring portal for 250+ riders (130K+ orders per month), correcting a cost report that understated spend by **~60%** and automating HR's monthly payroll attendance file.
- Cut payout-zone planning time by **~85%** (4–5 hours to 30–60 minutes per run) with a Python/Streamlit geospatial app on BigQuery covering 2,100+ postal codes, consolidating three tools into one.
- Own SQL/BigQuery KPI reporting for operations, finance and HR; identified and escalated misuse of delivery credentials for incentive payouts (fraud analytics).

Sabudh Foundation in collaboration with STPI (remote)

Jul 2026 – Present

Data Analytics Intern, part-time alongside full-time role

- Six-month applied programme: SQL, Python, Power BI, PySpark, Dataiku, machine learning and forecasting, NLP and applied LLMs, with a capstone project.

Indian Overseas Bank, Puducherry, India

Jun 2024 – Aug 2024

Banking Intern

- Processed KYC and account-opening data on Finacle core banking for a bulk customer-onboarding drive and corrected inconsistent customer records.

SKILLS

Analytics: SQL (Google BigQuery), Python (pandas, NumPy, GeoPandas, scikit-learn), Advanced Excel, Power BI, Looker Studio

Data engineering & automation: ETL pipelines, Google Apps Script, Streamlit, DuckDB, Git, GitHub Actions, Docker

Methods: KPI design, cost-benefit and root-cause analysis, anomaly detection, geospatial analysis, data quality validation

CERTIFICATIONS

SQL (Intermediate) and SQL (Basic), HackerRank, 2025 · Power BI for Data Analysts (Microsoft Press), LinkedIn Learning, 2024 · Business Analysis Foundations (IIBA-accredited), 2025 · Machine Learning, Simplilearn, 2025 · SEBI Investor Certification (NISM), 2025 · Verification links: rk7326181-lab.github.io/#certificates

EDUCATION

MBA, Banking Technology, Pondicherry University, India

2023 – 2025

B.Sc., Computer Science, Andhra Loyola College, Vijayawada, India

2019 – 2022
